

## Mobile Application - PulseMe

Simple and useful tracker of your pulse, which is compatible to all popular models of bluetooth wireless pulsometers.

The application allows you to see the changes of your pulse during the training, record the results of the measurements in automatic mode, track the parameters data on chart and estimate your physical form by heart rate recovery test.

Ergonomic and easy to use gadget!

**Heart rate**  
Shows your heart rate

**Recovery test**  
Test the recovery of your heart after training

**Bluetooth 4.0**  
Fast synchronization with applications

**Youwell Smart Heart Rate Monitor** monitors changes in your heart rate during exercises and transfers the data to your smartphone, helping to vary the load on your heart.

iOS App that works in combination with wireless heart rate monitors and tracks your heart rate.

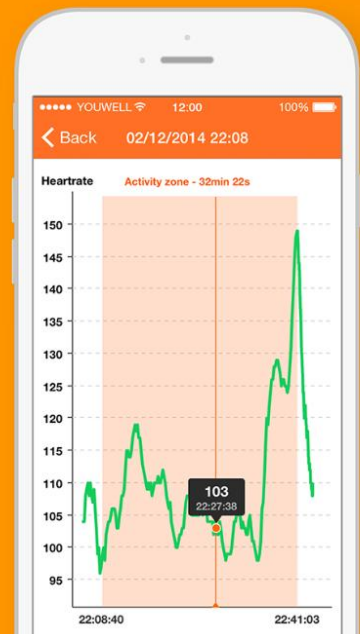

Monitor the changes in your heart rate during the exercises.

The test for recovery after exercise gives you information about your physical form.

The App stores a detailed graph for each training.
