

Web Application - Hotel/Apartments Search Engine

Meta search engine for end customer, we are working with all famous Travel Agency who provide Hotel and Apartments contents for us in real time via API.

The project includes

- A huge database of hotels
- A administration panel where you can modify any data related to hotels, edit, combine the two hotels in one, moved hotels from city to city, delete.
- Storage of photos on our servers
- Zoom photos
- The program find image duplicates
- Choose only the best image
- System caching queries
